Mr. Vic Hodges
Metalon Products
1116 Second Avenue South
Cranbrook, B. C. V1C 2B3

Dear Vic:

This letter is to inform you of the success I have experienced with Metalon Megasel Fuel Treatment. Injection pump failures have virtually been eliminated and exhaust emissions (smoke) have been significantly reduced.

I also sell Megasel to a varied group of customers. My clients include loggers, miners, truckers and road builders. Since switching to Megasel two years ago, my sales of diesel fuel treatment have tripled. Megasel is the conditioner of choice in the West Kootenays.

Metalon Products are used exclusively in my tanker fleet. Metalon M is used in our Caterpillar, Cummins, Navistar and Ford engines. Metalon M is also added to the transmissions and differentials of all our units. We have increased fuel efficiency and decreased oil temperatures.

I would highly recommend all Metalon products.

Sincerely,

Albert B. Benson, President
B. A. Benson & Son Ltd.
