

City of Lethbridge

FILE: 616

April 14, 1993

ATTENTION: Mr. Vic Hodges

Dear Vic:

Further to our conversation regarding the use of Metalon Grease in the bearings on our flail mowers, I'm please to inform you this grease has increased the bearing life 3 fold. Because of the severe conditions in which the bearings are operating, we were experiencing bearing failures two and three times a season.

In the last two seasons, we have not had a bearing failure, and in fact are contemplating running the bearings for two seasons. The cost saving have been significant to the City of Lethbridge.

Yours truly,

Doug Brandvold
FLEET SERVICES MANAGER
