Dear Vic Hodges

I am very happy to inform you of the successes we have had using Metalon Products. We use Metalon Hi-Tech EP 1.5 Grease and Metalon C2 Anti-Wear Friction Fighter. We have used the Metalon Grease in our finishing end veneer hog and reduced bearing heat from a 160 degrees to 90 degrees, which has increased the bearings life by six to seven times. We now use Metalon Grease in all our high speed bearings with great success. We find we don't get the separation that we get with other greases.

Metalon C2 we are using in gear units and some small hydraulic units. We find a reduction in heat which gives longer life to the oil and less down time.

Yours sincerely,

Roger Tress (head oilier)
